

E-CLOTH

For over 15 years, E-Cloth has been changing the way we clean households, with just water. With 480,000 fibres per cm², E-Cloths have enormous cleaning power. The act of drawing this volume of cleaning edges across a surface gives a deeper clean than cleaning with chemicals. The fibres break up and remove more grease and dirt, incredibly using just water. Using high quality fibres, the construction of each cloth is specifically selected for the cloth's end use. They easily outperform and outlast traditional cloths and other cloths made with similar but lower quality fibres.
